

## The Story of young ITI welders

Mr. S.B. Solanki

Mr. A.H. Parmar

Mr. A. I. Desai

Mr. J.B. Prajapati

Mr. N. P. Prajapati

The young talents from Gujarat ITIs have gone beyond the classrooms to showcase their skills in fabrication and welding. These 5 welding enthusiasts developed a multiskilling project model **‘Tractor with trailer’**. S.B. Solanki, A.H. Parmar, A.I. Desai, J. B. Prajapati, and N. P. Prajapati are all set to establish themselves as professional welders after their training.

The young lads were guided and instructed by their welding instructors B. B. Vatliya and R.P. Patel. The welders concede that they received inspiration and immense support from their ITI Principal as well. The model was made using minimalistic materials including sheet, squares, roundbars, foam leather, ball bearings, skating wheel, electrodes and bolts to develop the model. The making of the model involved designing, collection of raw materials, cutting and bending, welding, assembling, grinding, filing, painting and stitching of the cloth materials. *“Our model will help farmers enhance their transportation and thereby the whole agriculture ecosystem”*, retorts the young makers.

These welders from the state ITIs and their feat can be promulgated as a story to inspire their fellow trainees of our skilling institutions.
